SECTION TWO - READING COMPREHENSION (30 MARKS)

Read the text and do the two exercises that follow.

The EU is supporting the economic recovery in all Member States by injecting almost €2.2 billion into 140 key transport projects. These projects will help build missing transport links across the continent, support sustainable transport and create jobs. The projects will receive funding through the Connecting Europe Facility (CEF), the EU's grant scheme supporting transport infrastructure.

With this budget, the EU will deliver on its climate objectives set out in the European Green Deal. A very strong emphasis is on projects reinforcing railways, including cross-border links and connections to ports and airports. Inland waterway transport is boosted through more capacity and better multimodal connections to the road and rail networks. In the maritime sector, priority is given to short-sea-shipping projects based on alternative fuels and the installation of on-shore power supply for ports to cut emissions from docked ships.

The EU will support rail infrastructure projects located on the trans-European transport (TEN-T) core network with a total of €1.6 billion (55 projects). This includes the Rail Baltica project, which integrates the Baltic States in the European rail network, as well as the cross-border section of the railway line between Dresden (Germany) and Prague (Czechia).

It will also support the shift to greener fuels for transport (19 projects) with almost €142 million. A number of projects involve converting vessels so they may run on Liquefied Natural Gas (LNG), as well as installing corresponding infrastructure in ports.

Road transport will also see the deployment of alternative fuels infrastructure, namely through the installation of 17,275 charging points on the road network and the deployment of 355 new buses.

Nine projects will contribute to an interoperable railway system in the EU and the seamless operation of trains across the continent through the European Rail Traffic Management System (ERTMS). Upgrading locomotives and railway track to the unified European train control system will boost safety, decrease travel times and optimise track usage. The nine projects will receive over €49.8 million.

EXERCISE ONE (2 x 6 = 12 marks)

Choose the correct answer according to the text.

1. What is the €2.2 billion EU funding to EU members meant for?
 - A. Railway projects
 - B. Alternative fuels projects
 - C. Environmentally-friendly transport projects
 - D. Public transport projects

2. How will the nine railway system projects in the EU ensure safety, reduce travel time and enhance track use?
 - A. By converting vessels in order to run on LNG.
 - B. By installing 17, 275 charging points.
 - C. By improving engines and railway tracks.
 - D. By using alternative fuels.

EXERCISE TWO (6 x 3 = 18 marks)

Decide if the following statements are True (T) or False (F) according to the text.
