 - A. Unexpectedly
 - B. With some warning
 - C. Deliberately
 - D. Intentionally

PART TWO (15 marks)

Read the following passage carefully and decide whether the following statements are TRUE (T) or FALSE (F). Each statement carries 3 marks.

ENERGY

Energy is central to our lives. We rely on it for transport, for heating and cooling our homes, and running our factories, farms and offices. However, fossil fuel is a finite resource and is a major cause of global warming. So we can no longer take energy from fossil fuels for granted. We must create an integrated energy and environment policy based on clear targets and timetables for moving to a low-carbon economy and saving energy.

In December 2008 EU leaders adopted a comprehensive package of measures to reduce the EU's contribution to global warming and ensure reliable and sufficient supplies of energy. Being the most far-reaching reform ever of European energy policy, the package aims to make Europe the world leader in renewable energy and low-carbon technologies.

1. Energy is essential for our every day needs.
2. Fossil fuel does not contribute to global warming.
3. Fossil fuel will always be available.
4. EU leaders are trying to make sure that there will be sufficient energy resources for the future.
5. The new EU policy aims at increasing global warming.

SECTION THREE (20 marks)
TRANSLATION

Read the passage and translate it into Greek.

The energy which is produced by the sun is called solar energy. The light energy which we receive from the sun can be absorbed, stored, converted and used for the domestic purposes. This is a wonderful source of energy which can cut your electricity cost to zero. With a small onetime investment on purchasing and installing solar panels and batteries, you can meet the full requirement of your domestic electricity needs.

SECTION FOUR (20 marks)
LETTER WRITING

Reply to the following letter, on behalf of the President, asking for an appointment with the manager of the company. Your letter should be about 60 words.

Mr Georgios Shammas
President,
Cyprus Energy Regulatory Authority

RES Company
3519 Front Street
Brighton, UK

March 30, 2011

Dear Sir,

I would like to introduce my company, RES which develops, constructs and operates renewable energy projects and inform you of the benefits that can be gained by the operation of a wind farm in your country.

RES is an innovative leader in the global sustainable energy market. Drawing on our experience in the energy industry, we can develop projects of outstanding quality and value.

I will be very happy to discuss the prospects of the construction of a wind farm in your country.

Yours faithfully,

.....

Tom Smith
Regional Marketing Manager
