• **Multi-Criteria tenders**, where the awarding of A bid is subject to an evaluation of various Criteria.

## **RES-E Auctions Schemes Case Studies-1**

**RES WG has circulated a** questionnaire among MEDREG Members and up to date there are 10 responses (Albania, Cyprus, France, Greece, Israel, Italy, Lebanon, Palestine, Portugal, Turkey).

Note: 1. The questionnaire is focusing on the current policies that MEDREG Members are using and data concerning competitive auction schemes were provided from 2013 and beyond. 2.Italy is not included in the initial results of this presentation since the presentation was prepared prior to ARERA's response

## RES-E Auctions Schemes Case Studies- 7 (SWOT Analysis of Auctions)

#### Strengths

- 1. Cost Efficiency due to price competition
- 2. Useful to establish competitive pricing
- 3. Investor security linked to long term PPAs
- 4. Policy objectives can be achieved through auctions
- 5. Auctions are useful for volume and budget control

#### **Opportunities**

- 1. Development of different RET
- 2. Large-scale established developers are more likely to win a bid
- 3. Winning prices resulting from healthy competitive bidding can be used to establish cost-based FIT levels for certain RET

#### Weaknesses

1. Long and cumbersome administrative procedures

2. Discontinuous market development

4. Participating in auctions requires resources that small scale or new project developers may not have

5.Competitve bidding may lead to underbidding

#### Threats

1. Fail to deliver on time projects due to unrealistically low bids

2.Countries that have legally binding targets for RES-E, can easily fall back on their plan and targets

3. Failure to achieve the minimum mass of participants
